## MAPS Project Updates

MANITOU SPRINGS CO – Starting Monday (10/25), traffic on Manitou Avenue will be transitioned over to the new pavement, starting at Manitou Ave’s intersection with Waltham, and Wildcat Construction will begin reconstruction activities from Park Avenue to Waltham.

In addition, beginning October 27<sup>th</sup>, Colorado Springs Utilities will be mobilizing into the intersection of Minnehaha Ave. and Manitou Ave. to lower a gas line that has postponed construction activities in that intersection, therefore allowing for the curb and gutter, manhole, and paving work to be completed. After this work is finished, Minnehaha Ave. will be open for the remainder of the project.

We appreciate your understanding while we improve our infrastructure and utilities on the western end of Manitou Avenue!
