Rear Diagonal Parking Installation on the 500 Block of Manitou Ave.

MANITOU SPRINGS CO – An additional 24 parking spaces are coming to the 500 block of Manitou Avenue, due to a new striping configuration that will allow for a safer experience for cyclist, pedestrians, and drivers alike.

On April 11th, the replacement of the parallel parking with rear diagonal parking along the northern side of Manitou Avenue will begin. The removal of the old striping, and installation of the new pattern is expected to last until the close of business on April 15th.

During this time period, westbound traffic on Manitou Avenue will be detoured around Memorial Park using Old Mans Trail and El Paso Boulevard. Eastbound traffic will remain on Manitou Avenue, but please note, no on-street parking will be available during this time.

Please drive safely through the area while the crews are hard at work. We appreciate your cooperation while we work to increase parking inventory, and make our streets safer for pedestrian, motorists, and our cyclists alike!
