Manitou Springs Fire Department Offers FREE Property Assessments for Wildfire Vulnerability

MANITOU SPRINGS CO – Performing wildfire mitigation on our private property is the right thing to do for our community. Manitou Springs is extremely prone to wildfire and implementing basic mitigation to private property could be the difference between a savable property or one lost to wildfire.

The Manitou Springs Fire Department (MSFD) offers FREE Property Assessments for Wildfire Vulnerability. Our department will visit your home and **recommend** mitigations steps to reduce your risk of being affected by wildfire.

This program is available year-round to all Manitou Springs property owners and can be requested by calling the MSFD's business line at (719) 685-1444.

The MSFD has determined the wildfire risk of every parcel in Manitou Springs already, to view your basic risk, please visit: bit.ly/MSRiskPortal. And don't forget to watch for media postings regarding scheduled chipper days!
