MAPS Project Reconstruction and Paving Operations – Major Traffic Disruptions (May 16 – May 27)

MANITOU SPRINGS CO – Wildcat Construction will be performing roadway reconstruction and paving operations in between the Ruxton Roundabout and Tubby’s Turnaround from May 16 – May 27. Major traffic impacts are expected due to small amount of room to work in this area and concrete cure times. Only traffic heading into downtown will be available – there will be no access to the Western end of Manitou Springs from Park Avenue nor Downtown via Manitou Avenue. To access this section of Manitou Springs, please take US-24 to Serpentine Drive. Please note, emergency access through the area will be available at all times.

This will be the final paving work in this section of the MAPS Project, resulting in completed utilities installation, roadways, sidewalks, curb, and gutter from Park Avenue to the Smischny lot. After the crews mobilize out of the area on May 27th, all major construction activities will take place between the Smischny lot and Serpentine Drive.

We appreciate your understanding while we work towards an early-summer completion for the Maps Project.
