POSTPONED: Striping Operations Coming to Ruxton Avenue and Crystal Park Road

MANITOU SPRINGS CO – Due to the expected rainfall this week, the striping operations on Ruxton Ave. have been postponed one week. The new schedule is as follows:

From September 19 to 21, Ruxton Avenue will undergo striping of roadways and crosswalks. This process will extend beyond typical operations as the striping will be embedded within the asphalt instead of being placed on the surface. This alteration ensures that the striping remains durable for an extended duration compared to standard road paint.

The schedule is as follows: On September 19, the lower section of Ruxton, spanning from the Ruxton Roundabout to Church Street, will be striped. On September 20, the upper portion of Ruxton, from Church Street to the Iron Springs Chateau, will receive striping. On September 21, the contractor will complete the striping along the corridor.

Throughout these dates, minor traffic impacts will be taking place and on-street parking will not be available in the affected zones. Warning cones will be positioned beforehand to notify you about the specific dates and times when parking will be restricted. If you are a resident accustomed to parking on Ruxton, you are welcome to use any other legitimate nearby parking space without the risk of receiving a parking citation.

The parking impacts are as follows:

September 19: No parking on lower Ruxton, 7a.m. – 5p.m.

September 20: No parking on upper Ruxton, 7a.m. – 5p.m.

September 21: No parking along Ruxton, 7a.m. – noon

In addition to this striping, the same contractor will be performing striping on Crystal Park Road on Monday, September 18. These operations will take place in one day and will have minor traffic impacts.

As always, both of these operations are weather dependent.

We value your understanding and cooperation!
